For Immediate Release

The Information System Security and Reliability Assessment Centre (ISSRAC) jointly established by LSCM and China National Software & Service Company Limited has Officially Opened

9 May 2025, Hong Kong — The Information System Security and Reliability Assessment Centre (ISSRAC) jointly established by Logistics and Supply Chain MultiTech R&D Centre (LSCM) and China National Software & Service Company Limited has officially opened. The ISSRAC was inaugurated by Ir Tony WONG, Commissioner for Digital Policy, The Government of the HKSAR, Ms Emily MO, Assistant Commissioner for Innovation and Technology (R&D Centres), The Government of the HKSAR, Mr ZHANG Hongming, President of China National Software & Service Company Limited (Shenzhen), Mr YU Yi, Representative of International Collaboration Department, China Electronics Corporation (CEC), Ir Prof Alan LAM, Chairman of the Board of Directors, LSCM and Mr Simon WONG, Chief Executive Officer, LSCM.

Speaking at the opening ceremony, Mr Simon WONG, Chief Executive Officer, LSCM, said, 'LSCM is honoured to join hands with China National Software & Service Company Limited to establish the Information System Security and Reliability Assessment Centre (ISSRAC). The ISSRAC will help enterprises optimise their information security protection measures, enhance the security and reliability of their information systems, and provide the industry with better and more reliable innovative technology services, thereby contributing to the smart city development in Hong Kong and in the Greater Bay Area.

Mr ZHANG Hongming, President of China National Software & Service Company Limited (Shenzhen), said, 'China National Software & Service Company Limited is a large-scale, high-tech and listed software enterprise under the China Electronics Corporation (CEC). It is a key software enterprise in the national development plan. China National Software & Service Company Limited is pleased to collaborate with LSCM in introducing secure and sustainable Information and Innovation System products to Hong Kong organisations to enhance the security and reliability of the information system.'

The establishment of ISSRAC aims to bring secure and sustainable Information and Innovation System products to Hong Kong, provide the government departments and public organisations with testing and evaluation of Information and Innovation System products, the testing environment, professional consultation and solutions for cyber security related products. It also provides the industry with better and more reliable innovative technology services to enhance the security and reliability of the information system, which is an important milestone in strengthening Hong Kong's cyber security and ensuring the reliability of the information system.
