International Forum

Trends and Opportunities of Big Data Analytics and AI in the Greater Bay Area

29 June 2020 (MON)
0930 - 1300

Free Online Forum

Federation of Hong Kong Industries (FHKI) has successfully applied the Professional Services Advancement Support Scheme to commence a project namely "Empowering Big Data Analytics with Artificial Intelligence (AI) for the Professional Development of Information Technology Industry in Hong Kong" this year. One of the highlights of the project, the Online International Forum provides an informative platform for Hong Kong IT professionals to learn the opportunities of big data adoption and AI in the Greater Bay Area by renowned companies and the Government.
